

# Q-Wire System

A Remarkable Breast Localization System.

The Q-Wire System consists of a preloaded thickset localization wire within a highly echogenic puncture needle, accompanied by a topical fixation clip.

The unique tip of the localization wire forms the letter Q, which allows for optimal anchorage in breast tissue.

## FEATURES

### Needle:

- Self-feeding hub
- Centimeter depth markings
- Extremely sharp atraumatic tip
- Highly echogenic needle tip geometry coated for frictionless tissue penetration

### Wire:

- Repositionable
- Thicker than standard wires, reduces risk of wire transection
- Visible in Mammography and Ultrasound
- Firm Fixation in any tissue
- Depth Indicator, palpable/tactile surgeon's marker on the wire

### Q-Wire System
